C/C++ | Java | Python | OOPS | DSA (Data Structures) | HTML/CSS | Bootstrap | JavaScript | MongoDB | Express.js | React.js | Node.js | MySQL | Git/GitHub

Projects

News WebApp   (Code)

*A dynamic web application that delivers real-time news updates by fetching data from a third-party **news API**.*

- Utilizes **FetchAPI** to retrieve and display the latest news articles, providing users with current and relevant information.
- Allows users to filter news based on categories such as technology, sports, business, and more, enhancing user engagement and content accessibility.
- Tech Stack: **React**, **Bootstrap, FetchAPI**.

Landing Page   (WebApp Link | Code)

A Frontend design for the Landing page of a Website.

- Navigate to a particular section through a **smooth scroll** by clicking on the navigation bar.
- Toggle between **Light** and **Dark** Mode.
- Tech Stack: **React**, **Bootstrap**.

Todo List   (WebApp Link | Code)

Achieve your daily goals by listing all your tasks into a Todo List.

- **Edit** the tasks as per your requirement and **Delete** them as soon as you accomplish them.
- Tech Stack: **React**, **Bootstrap**.
